

Section J-5**Interfaces with IPC Provider**

This matrix offers workload information and explains the requirements for DRAS interfaces. The contractor is responsible for establishing and maintaining interface support with these and other entities for the business operations. This does not represent the total requirement, but offers a representative list. For more detail concerning interface formats and updates, see the DRAS Requirements documentation in the technical library.

Reference to the numbers 1 through 3 in the column entitled Location is as follows:

- (1) co-located with DRAS-RCPS,
- (2) Many files are available from and to systems that are currently co-located with the DRAS-RCPS on the same mainframe, and
- (3) Represents interfaces between DRAS-RCPS and DRAS APS.
- (4) DMC has been changed to DECC
